The New *Library Reading List* Tool in Quercus

August 31st, 2021
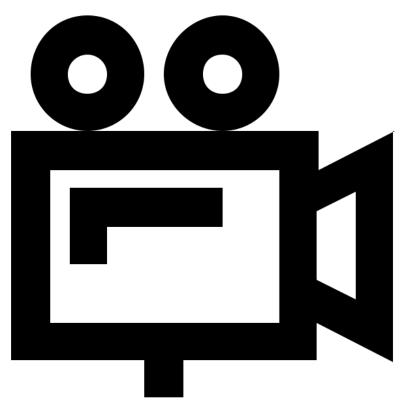

Erin Calhoun and Graeme Slaght
Scholarly Communications & Copyright Office
syllabus.service@library.utoronto.ca

This session is being recorded

Agenda

What is the Library Reading List app?
What does it mean for library services?

Demo: starting with a reading list

Demo: behind the scenes

Guides and Copyright Resources!

Leganto ("Library Reading List") Basics

Leganto is the third piece of UTL's new LSP

It replaces LOCR, which some libraries have used to manage electronic course reserves

UNIVERSITY OF TORONTO LIBRARIES

Library Reading List & LibrarySearch Work Together (and are kind of the same thing)

Library Reading List is fully integrated with both LibrarySearch and Quercus (via LTI); reading lists and citations will be viewable to users in Reading List App and to library staff in Alma; fulfillment of requests requires both systems

SISID course data will be loaded into system; integration with Quercus requires manual course association in Library Reading List app

By default, only enrolled students will be able to access Library Reading List for their course; (partial) reading lists will be also be discoverable in LibrarySearch
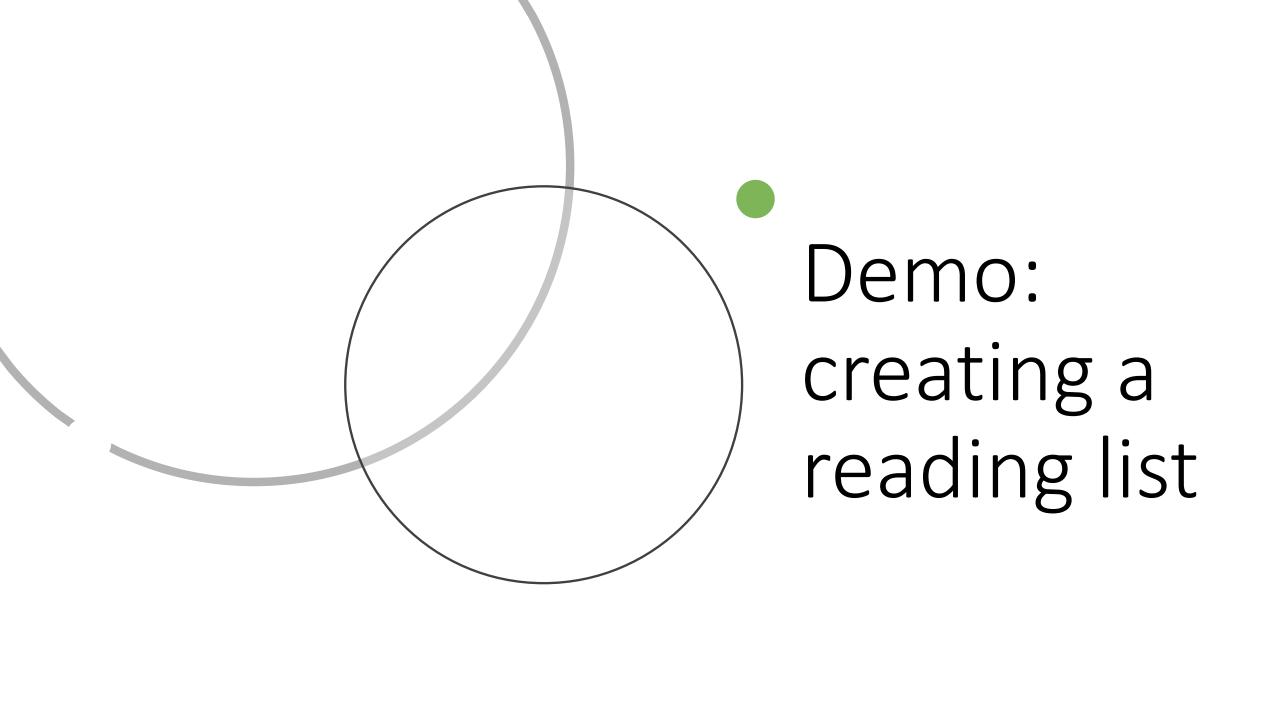

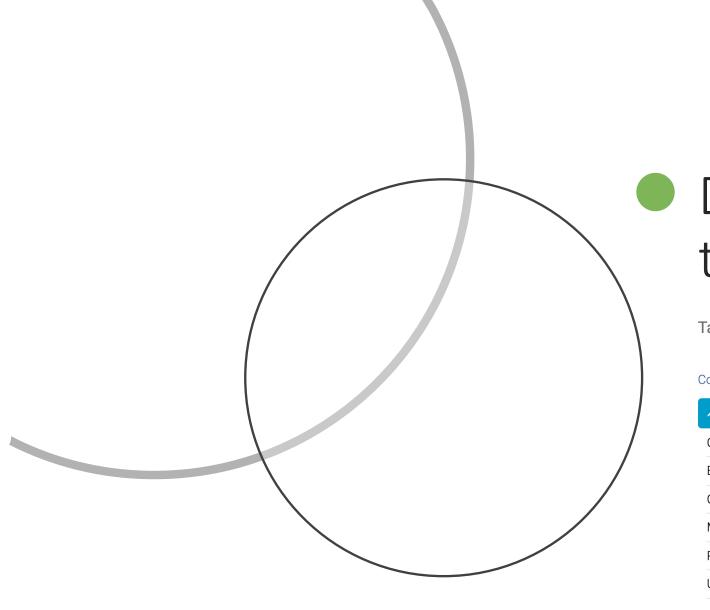

The app is constantly being updated

- It is in active development – since initial implementation, ExLibris has added many new features and fixes including:
    - LTI 1.3
    - "Social reading" - group PDF annotation
- There are features which we have turned off:
    - Analytics
    - Group discussion
    - User notifications
- <u>The app was designed for instructors and instructional support staff to do the data input</u>

Implications for Library Services

- The St. George Syllabus Service will continue to operate in a "full-service" model; we will do everything from data entry to scanning, from purchasing ebooks to buying licenses, as well as assessing copyright, when we receive a reading list

- Contact us at syllabus.service@library.utoronto.ca

- See policies and further instructions at http://uoft.me/coursereadings

- However, as users familiarize themselves with the system, they will likely use it as it was designed, and we will adjust how we support these requests over time

New! Copyright Modules in Quercus

Copyright and Teaching & Learning Video Modules

https://onesearch.library.utoronto.ca/copyright/copyright-video-modules

The University of Toronto (U of T) takes its copyright obligations seriously, recognizing the legal rights and interests both of copyright owners and of those who use copyright-protected work in their teaching and scholarship. This open course provides U of T faculty, students, and staff with a general overview of copyright through seven short, self-directed instructional modules. These modules are intended to help the U o f T community ensure that their professional activities comply with Canadian copyright law.
