Developing Tutorial Learning Outcomes

List the major things that you want your students **TO KNOW** (e.g., facts, theories, concepts, models, etc.) at the end of tutorials:

List the major things that you want your students **TO BE ABLE TO DO** (e.g., skills, abilities, procedures, etc.) after taking the tutorials:

Write your course tutorial goals (3-4) – the BIG IDEAS:

1. ____________________________________________________________
2. ____________________________________________________________
3. ____________________________________________________________
4. ____________________________________________________________

Translate goals into 5-7 learning outcomes. Please use action verbs for outcomes (e.g., “By the end of this course, students will be able to... identify, demonstrate, discuss, etc.

1. ____________________________________________________________
2. ____________________________________________________________
3. ____________________________________________________________
4. ____________________________________________________________
5. ____________________________________________________________
6. ____________________________________________________________
7. ____________________________________________________________
